

I am passionate about front-end development because I enjoy solving the problems that occur in the pursuit of writing a clean, maintainable and concise code. As a beginner web developer I have already developed a handful of projects from ideation/design to front-end development, some of them can be reviewed on rtsdr.com.

Education

2017 - present

Multimedia Design & Communication
KEA
Københavns Erhvervsakademi

2013 - 2015

English and Spanish languages
Vilnius University
Institute of Foreign Languages

2005 - 2013

SVG

Animations, Filters, Styling

Design, Prototyping

ADOBE

Illustrator, Photoshop, XD,
Premiere Pro

Figma

Testing

5Sec, Trunk, Think Aloud, BERT

Experience

2017/12 - 2018/01

"BH HotelService ApS"
Rengøringsassistent

Being a housekeeper in a hotel, I had to represent the hotel as a welcoming place for arriving and departing customers. I always managed to do that with utmost respect towards people I interacted with.

2015/11 - 2017/05

"Laukinis Sportas"
Sales assistant/service in a sports equipment shop.

I learned a lot of practical skills when it comes to service of the equipment. But the best thing I improved is communicating with clients, which I enjoyed doing and I know that my clients enjoyed communicating with me. I did a lot of research to know about the products I sell and to give the best possible advice to customers.

Leisure/Personal Profile

Hej, since you made it this far, I might as well tell you about myself. I am a multimedia design student from Lithuania.

In my free time I love:

Listening to music (I can make you a Spotify mixtape upon request)

Running (I can show you my Garmin account)

Reading (we can connect on Goodreads)

Having a proper beer with people while talking about life and weird dreams they had (I have nothing online for this).

That is it for the short introduction, more information will be disclosed in a job interview where we can talk about the weird dreams we had.
